

Drafting an emerging picture

Name: Priya Shah
 Community (UN SD goal): 3. Good Health and well-being
 Date: May 14, 2021

Instructions:

Using your researched information fill out the flowing comparing the current state of the art with what you think new (software) innovations could bring to the community

Covering the orientations	
Compare the left-hand column of the document "Technology configuration inventory" table with the right-hand column of the document "Community characteristics & orientation" table. What do you notice about the match (or mismatch) between your dominant community orientations and the current configuration of tools?	
How well does the technology inventory cover the orientations? What themes emerged from both the community orientations and the technology configuration from your colleagues' notes	Technology inventory has covered somewhat important tools that covers the certain degree of community orientation. I found it common to have a talk with an expert or counseling in each platform. This project will be having additional simple and easy to use features in one package.
<input type="checkbox"/> Are you almost there? <input type="checkbox"/> Are there big gaps?	It is still in progress. As of now, there are no big gaps found.
What is the range of skills? If their interests and/or skills are diverse, could it cause conflict or distraction?	There will not be huge technological skills required to access the platform. People of different range of interest/skills will not have any distraction.
Achieving integration	
Look at all the pieces of your configuration	
What level of integration and interoperability has been achieved?	There will be different kind of tools accessible to the users that will be helpful to improve their mental health. However, in some cases the expert advice might needed that can be integrated later. In near future, different features will integrate to the system.
Where are there big gaps	<p>The gap would be the identity and verification of people who are posting the blogs and using this tool.</p> <p>Other challenge might be the identifying the condition of the mental health of a person.</p>
Balancing the polarities (Current state)	

How is the configuration balanced with respect to each polarity?

[illegible]

...Synchronous tools?

Counseling , Expert Advice

[illegible]

...Asynchronous tools?

[illegible]

...Participation tools?

Participation in group chat, discussion in community

[illegible]

...Reification tools?

Listen to music

[illegible]

...Group tools?

discussion

Individual

...Individual tools?

How well does this balance fit
your community?

This balance fits to the community at proper level.

Solution seeking

In the new configuration, do you want your choice of tools to affect the polarities of your community in ways that differ from the current configuration? Which way?

[illegible]

...New synchronous tools?

[illegible]

...New participation tools?

Participation in group chat, discussion in community

[illegible]

...New asynchronous tools?

Random chat based on user's availability.

[illegible]

...New reification tools?

Affirmations, Sing together

[illegible]

...New group tools?

Group chat, community posting

Individual

...New individual tools?

Create goals, affirmations, sing together

MVP notes

I am trying to implement simple and easy to use features as mentioned above in given time period with defined MVPs.
